

Discrete Time Convolution

Output 1:

```
>> Experiment_3  
Enter vector x: [1 2 3]  
Enter vector h: [1 -1]  
Enter the value of N1: 3  
Enter the value of N2: 1  
1      1      1     -3
```

Reference is at 3.

Output 4:

```
>> Experiment_3  
Enter vector x: [1 2 3]  
Enter vector h: [1 -1]  
Enter the value of N1: 2  
Enter the value of N2: 1  
1      1      1     -3  
|
```
